

Transplant Multiple Listing Directory in New Jersey, Neighboring States and Puerto Rico

A Referral Decision Aid for Transplant Designees

- Educate patients on benefits of multiple waitlisting. This increases the chance of receiving an organ offer.
- Encourage multiple waitlisting at transplant centers in different Organ Procurement Organization (OPO) regions. There is no benefit in multi-listing to transplant centers within the same OPO.
- Review the transplant center criteria if referring a patient with Hepatitis C, HIV to confirm the center conducts these types of transplants.
- Once the patient has been referred, follow up with the patient and or transplant center monthly to evaluate the status of the referral.
- Ensure blood specimens are sent according to instructions provided by the transplant center.
- Below is the directory of transplant centers in New Jersey, its neighboring states and in Puerto Rico where most ESRD patients in Network 3 are referred to.

Transplant Center	Contact Number	Organ Procurement Organization (OPO)
